KTW recommendation part 1.3.13 Natural and synthetic rubber.

The materials used for diaphragm code 18 comply microbiologically with the requirements of the DVGW Worksheet W 270 (11/2007) for the use of seals with large and small surface areas and the requirements of the KTW recommendations of the Federal Health Office (Bgesundhbl. Jg. 86, 6 Mitt.) for Seals D1, for which we have confirmations of raw material suppliers.

## ***WRAS ACS W270***
