

GEMÜ®

Control Valve, Metal

Construction

The GEMÜ 566 2/2-way control valve has a body with an integrated control mechanism which can be controlled by various operator types.

Features

- Suitable for inert and corrosive* liquid and gaseous media
- Choice of three operator types (manual, pneumatic, motorized)
- Flow rates of 0.07 – 2.93 gpm
- CIP-capability

Options

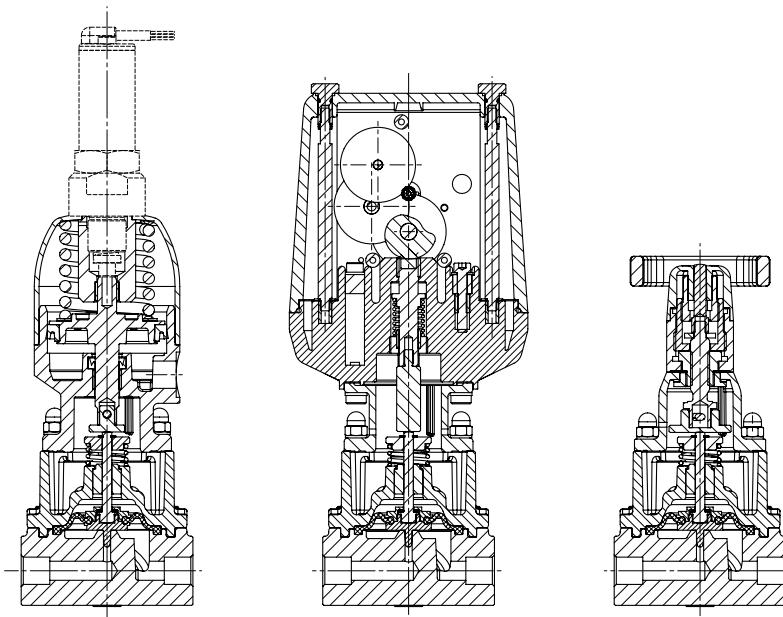

- Versions according to ATEX for manual and pneumatic operation on request

Advantages

- The integrated control mechanism enables simple operator replacement and subsequent automation
- The piping need not be emptied when replacing the operator as the spindle is sealed by an isolating diaphragm
- Linear and equal-percentage control characteristics available

*see information on working medium on page 2

Sectional drawing

**GEMÜ® 566**

Technical data - manually operated valve

Working medium

Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the body and diaphragm material.

Media temperature 194 °F

CIP max. 30 min
(Isolating diaphragm material code 33) 185 °F

Ambient conditions

Ambient temperature max. 140 °F

Operator material

Bonnet A4 stainless steel, (1.4408)

Cap PEEK

Handwheel A4 stainless steel, (1.4408)

Operating pressure

Operating pressure 0 - 90 psi

All pressures are gauge pressures.

Valve bodies are approved up to PN 10.

Maximum permissible seat leakage class

Seat seal	Standard	Test procedure	Leakage rate	Test medium
Metal	DIN EN 60534-4	1	IV	air

Order data - manually operated valve

In order to configure a complete control valve the pneumatically operated basic valve must be paired with an electro-pneumatic positioner. The GEMÜ 1434 and 1436 positioners and process controllers can be used for this purpose.

Technical data - motorized valve

Working medium

Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the body and diaphragm material.

Media temperature 194 °F

CIP max. 30 min
(Isolating diaphragm material code 33) 185 °F

Electrical data

Power supply	Uv = 24 V 50/60 Hz +/- 10 %
	Uv = 120 V 50/60 Hz +/- 10 %
	Uv = 230 V 50/60 Hz +/- 10 %

Power consumption 3.5 VA

Rating Continuously rated

Electrical connections
2 x PG 13.5
Versions AE, AP

2 x Round connector (Hirschmann plug N 6 R AM 2)
Versions E1, E2 and E3

Operating pressure

Operating pressure 0 - 90 psi

All pressures are gauge pressures.
Valve bodies are approved up to PN 10.

Protection class

IP 65 acc. to EN 60529

Ambient conditions

Ambient temperature 5 to 131 °F

Operating time

See actuator version page 7 approx. 17 or 45 s

Input resistance

33 Ω (input protected by reverse diode)

Maximum permissible seat leakage class

Seat seal	Standard	Test procedure	Leakage rate	Test medium
Metal	DIN EN 60534-4	1	IV	air
